

CORA is COMMITTED

TO PROVIDING THERAPY AND KEEPING YOU HEALTHY

here are a few steps we have taken

OPEN FOR BUSINESS

1 Prevention

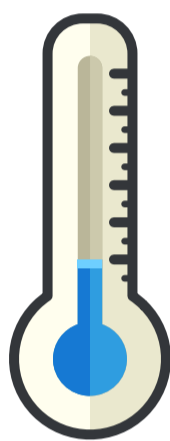

Prevention, is the key to stopping the spread of COVID-19. Washing hands frequently, social distancing, regular cleaning and disinfecting and staying home when sick.

We have asked all patient family members or others attending the therapy session to not be present in the clinic or waiting room during the visit. This small ask will help prevent the spread.

2 Continuous monitoring

Employees are required to take their temperature daily. Any provider with a temperature over 99.5 is required to stay at home, and be fever free for 72 hours. Additionally we are following all recommendations issued.

3 Clinic Cleaning and Disinfecting

All clinics are following CDC recommendations. This includes: disinfection of tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks using solutions with at least 60% alcohol. Laundry is being done on the warmest setting.

4 Patient Screening

A patient questionnaire is provided to every patient on each visit. This will minimize risk to patients and employees.

Answering "YES" requires the patient to immediately leave the facility and self-quarantine.

5 Telehealth and Therapy in the Home

Do you have symptoms? Or has it been recommended to stay at home? Your provider is able to do a live video-conference while you stay at home. They will be able to provide quality treatment and education. If telehealth is not a solution talk to a provider about Therapy in the Home.

You may have heard that Medicare and other private insurances are not participating in telehealth, Don't worry! We have additional solutions. Contact us!

6 Keeping Up to Date

CORA team members, are staying up to date on the daily changes. Make sure to visit coraphysicaltherapy.com and talk to your provider for daily updates.

COVID-19 should not slow your therapy down! We are making every effort to keep you safe and healthy while providing quality care.
